

Peggy Adams Animal Rescue League
Community Cat TNVR Application
(Trap-Neuter-Vaccinate-Return)

office use only

Important information before you start trapping: Cats must be dropped off between 8AM and 9AM and picked up by 9AM the morning following surgery. Traps must be covered with a towel or trap cover to reduce the cat's stress while they are in the trap. Do not put anything in the trap other than the cat – no cups, towels, etc. One cat per trap.

Cats must be three months old/weigh three pounds at the time of surgery – this is the minimum age/weight that we can vaccinate against rabies, as required by county ordinance 98-22 and very important to protect the cat and the community.

Your name: Address:

Address 2: City: Zip:

Phone (Daytime): Phone (Evening):

Email: How did you hear about Peggy Adams?

Check this box if cat lives at your address Check this box if you want to assume legal ownership of the cat. The microchip will link back to you (caregiver assumes liability for the cat per county ordinance 98-22).

If the cat does not live at your address, please list exactly where the cat lives – see note below:

Address/Location/Zip where cat resides:

Note: If you don't know the address, please give cross streets – example: NW corner of Main Street/Church Street in Boynton Beach – behind the Home Depot. Please give as much information as possible about where the cat lives. This will ensure the cat gets back to home base if they are ever picked up and scanned for a microchip.

Cat Color (check all that apply): Black Blue (grey) Red (orange) Brown White other

Cat Color Pattern: Solid Tabby Bi-color Calico Tortie Siamese (color point) I have no idea.

If known: Approximate Age Sex

Estimated number of cats that live at this location: Estimated number still needing TNVR:

Are you seeing kittens in the neighborhood? Yes No

The TNVR package includes: feline spay or neuter, rabies vaccination, FVRCP vaccination, microchip, ear tip, anesthesia/pain reliever, and medication to kill fleas/mites.

All cats will be ear-tipped per county ordinance 98-22

Ear-tipping is an effective and universally accepted method to identify a spayed or neutered and vaccinated free-roaming cat. All cats in this program will have their ear tipped. No exceptions.

An ear-tip is the removal of the distal one quarter of the cats left ear.

Grant funding currently allows us to offer TNVR at no cost to the community – but funding is limited. Any donation you can make will be greatly appreciated and help us help more animals.

- I may be interested in volunteering with Project CatSnip to help others in the community with TNVR.
I may be interested in fostering kittens to save lives and help get Palm Beach County to "No-Kill" for cats.
I may be interested in volunteering at Peggy Adams.

Please send me more information.

TNVR Program: Application and Surgical Release (continued)

All free-roaming cats must be brought in for surgery in a humane trap. We cannot TNVR a cat in a carrier, they must be in a trap. If you don't have a trap, please contact us: 561-686-3663 – email TNVR@peggyadams.org

Trap – yes

Carrier – no

Initial here: _____ I certify that, to the best of my knowledge, any cat(s) I present to the TNVR program have not bitten anyone in the preceding ten (10) days.

Initial here: _____ Peggy Adams Veterinary Surgeons reserve the right to decline surgery if they feel the patient is unhealthy. If a patient doesn't qualify for surgery our surgeons will advise you of the recommended next steps.

I am aware that the cat I am presenting for surgery has the following condition:
If none write the word "none".

Initial here: _____ I recognize and understand the risks inherent to anesthesia and surgery, particularly for cat(s) that are pregnant, in heat, injured, sick and/or have no medical history available. By presenting these cat(s) for surgery, I accept the risks for any underlying health problems that would complicate recovery and/or survival from anesthesia and/or surgery.

Initial here: _____ I understand that the great majority of community cats are in good health, but if it is determined that the cat is suffering or unable to survive a humane lifestyle the cat will be euthanized. By signing this surgical release form, I give my authorization for euthanasia in this circumstance.

Initial here: _____ I understand that the cats are scanned for microchips, and that if a microchip is found, further procedures may not be performed. The League may attempt to contact the registrant of the microchip and inform him/her how to retrieve the cat.

I understand that Palm Beach County ordinance requires ear tipping and microchipping. I agree that each cat spayed/neutered, or deemed previously spayed/neutered, will have the left ear tipped and will be microchipped.

Initial here: _____ I, the undersigned, hereby request surgical spay/neuter at Peggy Adams Animal Rescue League community cat TNVR program. I have read, understand and agree to the above and have had the opportunity to ask questions concerning anything that I do not understand.

I hereby release Peggy Adams Animal Rescue League, all veterinarians, employees, volunteers, and directors from any and all claims arising out of or connected with the performance of this procedure. I agree that I have not and will not claim any right of compensation from them, or any of them, or file action by reason of such sterilization or attempted sterilization of such animal or any consequences related thereto.

Owner/Caregiver Signature: _____ Date: _____
